

STATE OF TEXAS
OFFICE OF THE GOVERNOR

Quality information is integral to the objectives of private enterprise and government organizations at all levels. Both public and private sectors employ information governance, control, security and audit professionals to ensure that quality information is produced efficiently, effectively and in compliance with laws, regulations and contractual agreements.

Auditors, educators, security professionals and chief information officers — these dedicated professionals work in diverse sectors including finance, public accounting, government, utilities and manufacturing.

To increase public awareness about the important role of information governance, control, security and audit professionals in protecting and ensuring the quality of public and private information, May has been designated for an educational campaign.

At this time, I encourage all Texans to recognize the many contributions of governance, control, security and audit professionals in the public and private sectors. Their diligent efforts highlight the best of the Lone Star State.

Therefore, I, Rick Perry, Governor of Texas, do hereby proclaim May 11, 2009,

**Information Governance, Control,
Security and Audit Professionals Day**

in Texas, and urge the appropriate recognition whereof.

In official recognition whereof,
I hereby affix my signature this the
3rd day of March, 2009.

Rick Perry
Governor of Texas
